

# Everything you need to know when creating

1. I want every artist to have freedom in how he/she wants to create a page for the AnatomyArchive. Stay close to the templates, so that all pages are readable, but don't be shy to alter small things.

2. if you are publishing a page, but it is not finished yet -> write this somewhere:

not final

3. turn on shortcuts, it makes your life easier

4. if possible draw on grey background, so that its appealing in both dark and white mode + users wont get flashed in dark mode

5. avoid using/drawing explicit content as much as you can -> I don't want to age restrict the site, if possible

5. picture:

- width should be minimum 350 pixels so that the image fills the whole mobile width -> click on the little image symbol to adjust pixels
- don't make images longer than a 9:16 aspect ratio, so that they are fully visible on mobile without scrolling
- 840 width images are perfect (for horizontal images)
- avoid putting 2 pictures beside each other
